## "THE END OF THE LION"

Smoke oozes out of the computer. The lights dim--a near brownout. Check your wallet..still has all the cash...Is this the end of the internet/world? No! ZibraZibra has downloaded itself into your future and/or broken down your front door. Get a new hard drive, get a new life, and turn up the volume before the cops arrive....

A dazzling combination of raucous synths, fearless vocals, and guitar-mag shredding leave the average ZibraZibra listener wondering where they are. Fear not, ZibraZibra is not the final river Styx, but a hungry four-piece stationed out of Minneapolis, MN. ZibraZibra arrived on the scene Feb 06' and in mere months delivered the astounding LP debut "The End of the Lion". Within seconds this band left many unanswered questions. For now, *The End of the Lion*, a 12-track assembly of Kraftwerk/Ween inspired brilliance was home recorded and lovingly offered up to the public. Four months and 3 victorious "battle of the bands" later, ZibraZibra took stock of their deviant objectives and signed with Royalty, Etc. Records, seeking a wider audience and greater affection from the general public.

Catch ZibraZibra live before they forget about you, and stay tuned for band updates at [www.royaltyetc.com/zibrazibra](http://www.royaltyetc.com/zibrazibra).

L to R: Neil Zumwalde, Aaron Baum, Henry Mikkonen
